EDUCATION

- **Bachelor of Technology, ECE (AI & Cybernetics)** May 2023 – May 2027
  Vellore Institute of Technology - Full Time **CGPA: 8.72**

SKILLS

- **Programming & Scripting:** Python, C, C++
- **AI/ML:** Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, Large Language Models
- **Data Engineering & Analytics:** Data Manipulation, Data Analysis, Pandas, NumPy, Matplotlib
- **Databases:** MySQL, MongoDB, RDBMS, NoSQL, Database Fundamentals
- **Cloud & Infrastructure:** Cloud Computing, AWS, Linux, Docker, Containers, Virtualization
- **Backend & APIs:** REST APIs, Flask, FastAPI, Node.js, Express.js
- **Automation & DevOps:** Data Pipelines, Process Automation, Git, GitHub, CI/CD Fundamentals
- **Professional Skills:**Business Analysis, Solution Design, Process Optimization, Stakeholder Communication

EXPERIENCE

- **Telecom Technology Intern - BSNL** (June 2026 – July 2026)
  - Worked on telecom infrastructure, networking fundamentals, and communication systems. Gained practical exposure to telecom technologies and operational workflows. Worked on 2G, 3G and 4G network operations.
- **Business Development Executive Intern - Reddensoft Info. Pvt. Ltd.** (May 2026 – June 2026)
  - Assisted in business development initiatives and client engagement. Worked with cross-functional teams to improve customer outreach and communication. Worked on bidding and confirmation of project deals.

PROJECTS

- **AlgonaughtBoard – AI Crane-Monitoring Dashboard** | *Python, Deep Learning, FastAPI*
  - Developed an AI-powered predictive maintenance system to monitor crane operating conditions and forecast potential equipment failures using telemetry features
  - Contributed to AI model development, backend integration, and system-level functionality, supporting the processing of equipment telemetry and interpretation of model outputs for maintenance decision-making.
  - Troubleshot data-processing and integration issues to improve system reliability and translate predictive model outputs into actionable maintenance insights for equipment monitoring.
- **Customer Behaviour Data Analysis** | *Python, SQL, Power BI, Pandas, NumPy*
  - Developed an end-to-end data analytics pipeline using Python, SQL, and Power BI to ingest, clean, transform, and analyze 50,000+ transaction records, identifying seasonal purchasing trends, demographic patterns, and preferred payment channels.
  - Applied data preprocessing techniques, missing-value handling, data validation, and exploratory data analysis using Pandas and NumPy to improve data quality and maintain consistency across analytical datasets.
- **Lansera - AI Dataset Chatbot** | *Flask, Pandas, Matplotlib, Cohere API*
  - Developed the backend and AI model integration for a dataset-driven conversational chatbot using NLP techniques. Reduced response time 15% while achieving 92% answer accuracy. Built and optimized backend architectures to ingest, process, and query large-scale structured and unstructured datasets efficiently.
  - Optimized prompt engineering and response generation workflows via the Cohere API, enhancing contextual relevance and user intent alignment across multi-turn conversations.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Machine Learning Specialization – Stanford University (DeepLearning.AI)
- Applied Machine Learning with Python – Coursera

LEADERSHIP

- Program Representative, ECE (AI & Cybernetics) Students' Council (2024–2025)
- Technical Team Lead, IoT Club (2024–2025)
- Floor Student Representative, Hostel Administrative Council (2025-2026)
